Business Network Design, Installation and Maintenance

Leavenworth Online can design, install and maintain your local area or wide area network. From cabling to server and router configuration we can establish or upgrade your entire business network.

Ongoing network and computer maintenance is one option our customers have found beneficial. By performing preventative maintenance, software and hardware upgrades, and network expansions your business network will perform optimally.

Outsourcing your company's network maintenance needs to Leavenworth Online will reduce operating costs as well as providing peace of mind that your network is being monitored and maintained by Leavenworth Online's knowledgeable staff.
